REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the structure set forth in the claims, including the structure obtained by preventing surface roughening in a peripheral portion of the electrode(s), as set forth in the claims. The prior art made of record shows prior art surface roughening processes (first two references), and structure arising from placing an electrode after a surface roughening process (third reference). Krames et al. shows in figure 7b to protect the edges of an electrode during ordered interface texturing. The Japanese reference shows an electrode on a pre-roughened surface. Note that Applicant's specification sets forth specific advantages associated with the protection of the side surface of the electrode during surface roughening (Table 1), and notes that this protection also avoids undesired etching around the electrode [0039], which contributes to the improved performance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.
